

Electrical Connector Maintenance Kit

HCT1973A

The tools contained in this kit were selected for maintaining the Augusta AW139 helicopter. The tools in this kit may not entirely correspond to the OEM wiring manual but are largely Military Specified tools, in certain cases perhaps more suited to maintenance than production to cover the requirements for the AW139.

Whilst this particular kit is a comprehensive kit, Henchman cannot guarantee that this kit will cover every requirement on the AW139 and from experience have found that it certainly would go very far on many other aircraft. Henchman can customise to your requirements and has done other connector tooling kits in this way which may cover your needs. Henchman takes pride in producing many customised toolkits to meet task specific requirements.

This toolkit is supplied in two-colour high density foam which provides visual tool control in a robust, deployable All-in-One toolbox.

Note: Due to updates and protection of our proprietary knowledge base, tooling lists for our Connector Tool kits are not available for distribution.

Specifications

- Mil-Spec tooling
- Skydrol Resistant Case
- Visual tool control
- Suited to PART 145 compliant organisations
- Dimensions: 581W x 381D x 455H

About Henchman

Henchman Products is an international single-source supplier of premium tools, specialised tooling solutions, repair and calibration services and toolkits for specialised industries such as aerospace, electronics, defence, field and plant service, transportation, mining & energy, assembly & manufacturing and more.

Henchman toolkits with Visual Tool Control and Electronic Tool Control are renowned for their superb quality finish and design and are available for purchase globally.

Whatever your requirements, with our range we can empower you to work professionally!
