

Wheel Change Toolkit

WCKWB-1F

The WCKWB-1F Wheel Change Kit for Wide Body aircraft is fitted predominately with USA made PROTO tools. Further customisation is possible and Henchman prides itself in bringing together kits combining top quality brands of tools which meet the expectations of engineers performing daily mechanical maintenance of aircraft.

Tools are laid out in two-colour high density foam which provides visual tool control in a robust, easily deployable case with wheels. Excellent for flyaway applications or issued as a personal tool kit.

All foams are cut in-house in our facility by our experienced staff giving you better service, quality and quicker lead times.

We also offer laser marking service meaning all your tools can be delivered with your company name and toolkit number, giving even the most basic tool control system a high level of accountability and control.

Dimensions: 546W x 347D x 247H

About Henchman

Henchman Products is an international single-source supplier of premium tools, specialised tooling solutions, repair and calibration services and toolkits for specialised industries such as aerospace, electronics, defence, field and plant service, transportation, mining & energy, assembly & manufacturing and more.

Henchman toolkits with Visual Tool Control and Electronic Tool Control are renowned for their superb quality finish and design and are available for purchase globally.

Whatever your requirements, with our range we can empower you to work professionally!
